Re: TRITON T80 Electric Shower

To whom it may concern

In March 1984, I purchased the above item from TESCOs in Southampton. This unit has served in both the UK and New Zealand locations with outstanding performance

TRITON ELECTRIC SHOWER

Model **T80 series (Roman) III temperature stabilised electric water heater**

S/Number **186934**

Unfortunately, time and corrosion have dealt to the Water Flow Control plate inside the Stabiliser Valve Assembly (Part Number 92200950). As this part is no longer available here in New Zealand, and the unit remains electrically sound, my only option is to make a new flow control plate to fit. If you still have the drawing of this component from which I can make a replacement as the corroded plate is unsuitable to work from

This unit lasted from time of manufacture in UK, through 2 flats in Southampton, 1 flat, 2 houses, two marriages and 8 kids, and finally gave up in March 2009. Now That's a Track Record!

This unit had been replaced with the TRITON T80xr slimline electric shower at that time with the intention of repairing the old one and using it in the holiday place at the beach

Yours Sincerely
