INSTALLERS PLEASE NOTE THESE INSTRUCTIONS ARE TO BE LEFT WITH THE USER

FIXED SHOWERHEAD

INTRODUCTION

Your shower is supplied with a single mode, fixed showerhead.

WARNING!

Do not use abrasive or solvent cleaning fluids. The showerhead should be cleaned using a soft cloth and warm water.

CLEANING

Triton recommends that all products are cleaned using warm, soapy water.

DO NOT use abrasive or aggressive chemical cleaning products as this may affect the product surface finish and invalidate your guarantee.

Before cleaning, turn off the unit at the mains supply to avoid the shower being accidentally switched on.

It is important to keep the showerhead clean to maintain the performance of the shower. The hardness of the water will determine the frequency of cleaning. For example, if the shower is used every day in a very hard water area, it may be necessary to clean the showerhead on a weekly basis.

DO NOT use a pin or similar to poke the holes otherwise the efficiency of the shower spray will be impaired.

In extreme cases, remove the showerhead and leave to soak overnight in a mild proprietary descaler. Make sure all traces of scale are removed and thoroughly rinse in clean water afterwards.

Before refitting the showerhead, flush any debris out of the arm.
